Documentation

- **OpenCV (opencv-contrib-python)**
  OpenCV Documentation
  Provides comprehensive guides and tutorials on image processing, computer vision, and how to use OpenCV's libraries.

- **Google Text-to-Speech (gTTS)**
  gTTS Documentation
  Offers details on how to integrate text-to-speech capabilities into your Python projects.

- **pygame**
  pygame Documentation
  Covers usage of the pygame library for multimedia, including playing audio files generated by gTTS.

- **Google Generative AI (Gemini endpoints)**
  Google Generative AI Documentation
  Provides information and guidelines on integrating Google's generative AI services (the Gemini endpoint) into your applications.

- **RPi.GPIO**
  RPi.GPIO Documentation
  Includes setup instructions and API references for managing Raspberry Pi GPIO pins and handling hardware inputs like tactile buttons.

- **Raspberry Pi Official Documentation**
  Raspberry Pi Documentation
  Offers a wide range of guides on hardware setup, OS configuration, and interfacing with peripherals, which is useful when building Raspberry Pi projects.
